## Comments about **Watergate 05** - Ellen Allien

Gelgen

Man, this mix is uneventful. I've been reluctant to admit that Ellen's career as a Dj is going down the well, but her latest works on this field are really confirming it. More self centered than anything, she seems to be playing music just for herself, but without really breaking into new territory or creating something exciting. the tracks are good, the ideas are OK but the mix is poor and the end result lacks any build, momentum or interest. A big letdown for the Watergate series after Sebo K's fantastic Volume 4.
