Comments about **Nubya's 5ive** - Nubya Garcia

Oreavi

Just managed to pick up a copy at the Jazz Re:refreshed show in Brighton for £15. So if you're planning on going to see a current London jazz group atm try the merch stand and don't pay a silly price !

Dammy

Repress please!!!!

Vut

any news on a repress coming up ? small press is a shame for such a record !

funike

Buff... A highly price for a bad pressing. Both things are a shame because is a great record.

Kalrajas

Yeah the pressing is no good. Why on earth is this acceptable? It's selling a faulty product as far as I am concerned. Big shame.

Mr_NiCkNaMe

Sounds as if they sorted the issue for the second press then. Doesn't help me much though!

Zorve

I got the repress and literally all plays out loud and fine, no skips, no pops.

LadyShlak

Anyone interested in trading with Ill considereds 1st or 3rd album?

Saithinin

I recently got the repress and the noise (statics & pops) is insane. There is even a repeating skip on side b-track 2. It is such a toss up these days regarding quality. That said the music is incredible.

Malodora

I have the reissue, and mine is fine, no clicks and pops except in one track, but again nothing serious, I guess I was lucky.

Hunaya

same with original release. sound or maybe vinyl quality is really bad. but music is awesome

Villo

Just re-released on Bandcamp £15.00. Limited Edition

<https://jazzrefreshed.bandcamp.com/album/nubyas-5ive>A fabulous album . Shame about the

profiteers

Stan

Unfortunately the repress is already sold out. Hope more is coming !

Moogugore

Forget the high prices on here go to her band camp its like 11.99 stunning record.

DART-SKRIMER

also why is somebody selling it at ridiculously high prices when its available brand new for £11 on bandcamp lol

Kekinos

Yes I totally agree with the last reviewer, the sound quality is really bad. I thought it was my hifi at first but it is just plain bad. My copy is quite noisy on the first track. The pressing is really bad... was there any quality control?

Kanrad

Sound quality is horrible , first tracks from each side are ok, but the rest is all distorted :(shame, because it is one of the best jazz releases this year
