Comments about [Holy Serpent](#) - Holy Serpent

We should probably make the record cover the actual picture

Goldendragon

This is an incredible record, from start to finish. The instantaneous downbeat of track one "Holy Serpent" tells the listener he/she is in for an aural journey that will wind down an untrodden path. From this moment until the final cut, "The Wind," the listener is transported through a myriad of existential visions beginning with the "Holy Serpent" and slithering with nothing less than a grimy, fuzz-ridden, sludgy ride through "Shroom Doom," while discovering "Fools Gold," until arriving through "The Plague" and finishing with a monumental washing by way of "The Wind." All tolled, this Australian doom/psych unit has it going on, and grabs the listener by the fuzzy balls (or whatever) from note-one. If you like doom, sludge, space, or psychedelic rock/metal, do yourself a favor and get this record.
